Moody Radio: This Just In

Satellite Switch from SES-2 to SES-11 | April 1 - June 1, 2025

Moody Radio will be moving from our current satellite **SES-2 at 87-degrees West Longitude** to **SES-11 at 105-degrees West Longitude** this spring. The new carrier will be up and operational by **April 1** and the old carrier will no longer be available after **June 1, 2025**. There is a **two-month window** for Moody Radio affiliates to re-aim their satellite dishes to the new carrier on SES-11.

Moody Radio partners receiving programming via satellite will be responsible for re-aiming their own satellite dishes to the new SES-11 satellite. Your station or network will want to bring in an engineer experienced with satellite alignment and installation procedures to take on this project.

An engineering overview of the project is available on this two-page [Tech Specs Quick Guide](#).

More details are available on our **Tech Specs** 7-page document at this URL:

https://www.moodyradio.org/siteassets/stations/affiliate/tech-specs/techspecs_ses-2_switch_to_ses-11_7-pages_03-26-2025.pdf

All documents linked from the Tech Specs 7-page document can also be found on the Moody Radio Affiliate website's [Resources](#) page.

This includes the following documents in addition to the Tech Specs noted above:

- [DishPointer.com look angles to SES-11 for major U.S. Cities](#)
- [SES-11 Repoint Troubleshooting Guide](#)
- [Instructions for Maximizing the Satellite Signal to Satellite Receivers \(from CRTech.org archives\)](#)

For receiver configuration support, please email us at affiliates@moodyradio.org. Or call [David Woodworth](#), Moody Radio Network Affiliate Support Coordinator at (312) 329-4435.
