See You at NRB!

We can't wait to see you next week. Add us to your schedule by emailing George at george.economos@moody.edu, or stop by our suite—Delta Island 5—for coffee and a conversation about content opportunities.

Help Your listeners Take Their Next Step with Jesus

Have you heard about our new program, *Karl & Crew*? One listener, Alice, shared this with us:

I've been a Christian for as long as I can remember but have always struggled to have a consistent prayer life. Recently, I was in a small group and sharing with a friend how I need to pray more fervently. She mentioned listening to—and being encouraged by—Karl & Crew. I started listening to the whole gang each morning and have begun to learn from the bold way that Karl prays. It's like he's talking to a friend.

Program Information:

Length: Three :57-minute stand-alone hours

Air Dates/Times: Moody-2 Live Release: Monday–Friday | 6:00–8:57 a.m. CT

Note: Hours may be time-shifted for use in various dayparts.

For more information, tech specs, and how to carry *Karl & Crew*, visit:

Moody-1 Program Schedules & Clock Changes

Coming March 1, 2026

We have recently learned that The Garlow Perspective, a daily one-minute feature with Jim Garlow will be ending production and the final program will air Friday, February 27. The program will be replaced March 1 with a release of Joni and

Friends in the first floating break of In the Market with Janet Parshall (Hour-1) at approximately 4:07 p.m.

An updated set of Monday-Friday daily 24-hour clocks eff. March 1, 2026 is now available at:

https://www.moodyradio.org/siteassets/stations/affiliate/misc-pdf/moodyradio_current_combined_m-f_clocks_24-pages_eff_03-01-2026.pdf

The only clock change currently is page 17 for the M-F 4pm CT hour.

2026 Spring Satellite Sun Outage Forecast | March 1-9

With the coming of spring, it is time to prepare for the upcoming spring satellite sun-outage schedule that may disrupt your programming. This occurrence happens in the spring and fall when the satellite transits the sun's disk for a few minutes each day over a period of several days in many parts of the United States.

The Moody Radio satellite channels (Moody-1 and Moody-2) on SES-11 (105-degrees West Longitude) Transponder 21C will experience the first outages of the season around March 1, 2026. The following tech spec sheet provides a representative list of major cities displaying the projected 2026 spring outages, centering on the longest day with beginning and ending times of the predicted outages.
