Subject: Sunday Praise Host & Format Change

Sunday Praise Changes to New Host & Format | Sunday, July 20, 2025

The logo for Sunday Praise. It features the words "SUNDAY PRAISE" in a white, uppercase, sans-serif font. The word "PRAISE" is in a larger font size than "SUNDAY". A small yellow sun icon is positioned between the two words. The logo is set against a solid blue rectangular background.

Sunday Praise, the three-hour Sunday morning music block on Moody-1 will be changing to the Praise & Worship Channel format clock beginning Sunday, July 20.

Sunday Praise will also have a new host in veteran radio announcer Jon Hemmer during the Sunday hours of 6:00 a.m. through 8:57 a.m. CT. **Stations should note the format clock details will change on Sunday, July 20**, and they can be found on the Moody Radio Affiliate website's "[Resources](#)" page, with a direct link of: moodyradio.org/siteassets/stations/affiliate/misc-pdf/sunday_praise_clocks_3-pages_eff_07-20-2025.pdf

The most notable changes these hours will be the two, two-minute floating breaks move from the quarter hour marks to the 20-minute and 40-minute marks, while the previous three-minute hard break at the bottom of the hour break from 28:00-to-31:00 goes away. In addition, the one-minute barter spot at 54:00 goes away and the feature content from 55:00-to-57:00 moves elsewhere. The music runs from the top of the hour to the 57-minute mark each hour.

The complete 24-hour set of MB1 Sunday Clocks effective July 20 can be seen at: moodyradio.org/siteassets/stations/affiliate/misc-pdf/moody-1_current_combined_sunday_clocks_24-pages_eff_07-20-2025.pdf

In addition, the current Moody-1 Network Relays NR2 at 54:00 and NR3 at 55:00 will be removed Sundays from the 6am, 7am and 8am hours CT.

Moody Radio offers new XDS-PROS Receivers for Sale

With the current satellite transition from SES-2 to SES-11, some Moody Radio affiliates have asked about replacing their aging XDS-PRO1Q and XDS-PRO4Q receivers originally deployed in 2012–2013.

Many of these units are now over 13 years old, and factory repair support ended in 2020. While older “Q” models can still receive the SES-11 satellite feed, this may be a good time to consider upgrading to the current “S” model receivers.

The [**XDS-PRO1S**](#) (single audio output) and [**XDS-PRO4S**](#) (four audio outputs) feature:

- 256 GB solid-state drive
- AES Livewire+ port
- DB-9 analog audio output(s)
- LAN-1 and LAN-2 Ethernet ports
- DB-37 relay ports

Most affiliates can continue accessing both Moody-1 and Moody-2 using the [XDS Affiliate website](#) for scheduling via the XDS Network Management System.

Moody Radio currently offers these receivers to affiliates at the following prices:

XDS-PRO1S – \$2,255.00 (245 GB SSD, one audio output)

XDS-PRO4S – \$2,950.00 (256 GB SSD, four audio outputs)

An additional configuration and handling fee of \$125 per unit applies, plus shipping. Prices are subject to change.

To confirm pricing or to begin your order, please contact Moody Radio Affiliate Relations at affiliates@moodyradio.org.
